

the unique S9 clay tile

The S9 is simply unique. It is similar to a plain tile but larger and is beautifully engineered to the same high standards as all of our tiles.

With a covering capacity of just 9.2 tiles per square metre it makes the S9 tile a great choice for a very economical and attractive roof.

These tiles have proven to work extremely well with both contemporary and traditional architecture and are available in a range of different colours and finishes. The Heritage Black featured here (at front) is very popular as it has a similar appearance to natural slate but with better technical properties.
