BUILDING PRODUCTS

A SUSTAINABLE NATURAL BUILDING MATERIAL

Every effort has been made to ensure reasonable accuracy of all products shown in this brochure. The product colours shown in this publication can vary due to the limitations of the production process. With this in mind, we advise all customers to view a sample of the actual product. Crest and its manufacturer's is continually innovating and improving their products and services. Therefore, we reserve the right to change product specifications without notice. All products are subject to availability and the company's standard conditions of sale. **March 2025**

About us

Crest - ABC Partnership

Crest have developed a strong working relationship with ABC Klinker Group one of our many European manufacturer partners, which has been built through a mutual respect and trust over many years. We have developed a range of building products which include facing bricks and pavers. The ABC Klinker Group, are a family-owned business in the brick and tile industry located in Germany. We look back on around 140 years of experience. Our product range is based on one of humans' oldest natural building materials - the clay.

Today, the ABC Klinker Group is in the sixth generation and manufactures various brick products at six plants in Germany. Our product portfolio includes facing bricks, brick slips, clay pavers, clinker roof tiles and floor ceramics.

Sustainability

The CREST-NORDIC® is a product that is made of natural raw materials. Clay from regional clay pits is used as well as renew-able energy in our production. Sustainability also plays a major role in the processing of the CREST-NORDIC®. The ceramic plate can be screwed onto a rear structure and removed at any time without leaving any residue.

We follow the "Cradle to Cradle" concept, which ensures that all materials that arise in the context of biological and technical cycles are used for subsequent cycles. This also makes the meaning of cradle to cradle understandable. Products are kept in a closed cycle from their creation to the end of their life cycle and are 100% re-used after use to develop the next product.

Innovative

The renaissance of bricks has shown that the brick as a building material has again successfully adapted to the new requirements and tasks of its time - that is why we are already working today on the brick products of tomorrow.

Crest are proud to be a main supplier of the new Nordic clay system for facade and roof.

About Crest Nordic

Clay System

The CREST-NORDIC® ceramic system is a homogeneous, durable “brick armor” with traditional material language in a modern brick design. A light and quick-to-use ceramic system with all the advantages of a ventilated facade. CREST-NORDIC® is easy to use and suitable for renovations and new buildings. It combines the materiality of the facade with the roof, so that the buildings appear to be made from a single piece.

- Permeable to diffusion
- Graffiti-resistant
- Fully recyclable
- Made of natural raw materials
- Can be dismantled and reused
- Available in different colours and formats on request

Product Features

Frost-resistant

Environmentally friendly

Water absorption $\geq 3\%$

Colour-fast

Weatherproof

Fire behaviour: Euro-class A1

Standardised

Tile Format

Length	400mm
Width	175mm
Height	30mm
Material thickness	approx 14mm
Weight	approx 2.8kg
Lath spacing	approx 135mm*
Pieces per m ²	approx 18.65 pieces
Pallet requirements	288 pieces

Further formats on request.

*The correct lath spacing must be determined at the construction site.
Screw holes must be sufficiently covered.

Colours

Rust Red

Roof structure

Roof details

- 1 Gypsum plasterboard
- 2 Battens
- 3 Thermal insulation
- 4 Timber rafter
- 5 Wooden cladding and waterproof sealing (Delta barrier film)
- 6 Timber furring with waterproof sealing and Nail sealing tape/air gap
- 7 Battens
- 8 Crest-NORDIC tile

Drawing: KBNK Architekten, Hamburg

Variant of construction

Variant of construction

- 1 Stainless steel countersunk-head screw 4.5 / 45mm
- 2 Nail sealing tape
- 3 Wedge plank
- 4 Waterproof sealing
- 5 Wooden lagging
- 6 Counter battens
- 7 Roof membrane
- 8 Timber rafter

| Variant of construction

- 1 Asphalt-treated chipboard | Celit 4D, ISOPROC
- 2 Counter battens / installing with wire pins
- 3 Delta barrier film 17.5 / 25 cm

Graffiti-Remover

Crest Nordic® is Graffiti Removable

Graffiti can be easily removed with Crest-Nordic® Graffiti-Remover. It has become part of the appearance of our cities and villages, but it is rarely welcome.

On the one hand, they rarely meet the aesthetic taste of the house wall owners and on the other hand their removal is usually very costly. Although it is hardly possible to prevent the mostly night-time spraying activities, by choosing the building material for the exterior wall one can at least ensure that they disappear as quickly as they came and after their use they are 100% reused for the development of the next product.

Thanks to the extremely high firing temperatures in the manufacturing process, our products have a surface that reliably prevents the penetration of colors of all kinds. This means that graffiti remains only on the surface and can be removed quickly and effortlessly above all without residue with the ABC graffiti remover.
