# WELCOME TO THE CREST RANGE OF NATURAL CLAY PAVERS.... DEVELOPED SPECIFICALLY FOR THE UK MARKET

## ENHANCED OPEN SPACES

From ancient times, clay paving bricks have been the favourite material of ‘civilised landscape designers’ who appreciated the longevity and creative benefits of fired clay.

Our manufacturing partners have cultivated this ancient tradition with their special firing process, which gently enhances the colours and provides a silk like finish the brick paver surface.

Cradle to Cradle  
Certified®  
Certifying products that  
are good for you and  
good for the planet

Every effort has been made to ensure reasonable accuracy of all products shown in this brochure. The product colours shown in this publication can vary due to the limitations of the production process. With this in mind we advise all customers to view a sample of the actual product before ordering. The Crest Paver range is manufactured from natural raw materials and thus may be subject to slight colour and texture variations, which can also enhance their general appearance. Please consider that being a natural product our clay pavers appearance can differ in various weather and lighting conditions. Crest reserve the right to change paver styles without notice. All products are subject to availability and the company's standard conditions of sale. **01/01/2026.**

# CREST CLAY PAVER SELECTOR

Our natural clay pavers are available in a variety of sizes and colour finishes to suit any location whilst providing Architects and Planners with a multitude of design options for paving patterns and bond styles.

## CREST CLAY PAVER RANGE (200 series)

Crest clay pavers need very little if any maintenance. Clay paving bricks are resistant to weather conditions such as frost and are not as susceptible to the rigours of modern clay environmental elements such as oil, petrol, rubber, dirt and grit.

^ Norden Orange Grey  
Available in 240x118x52mm

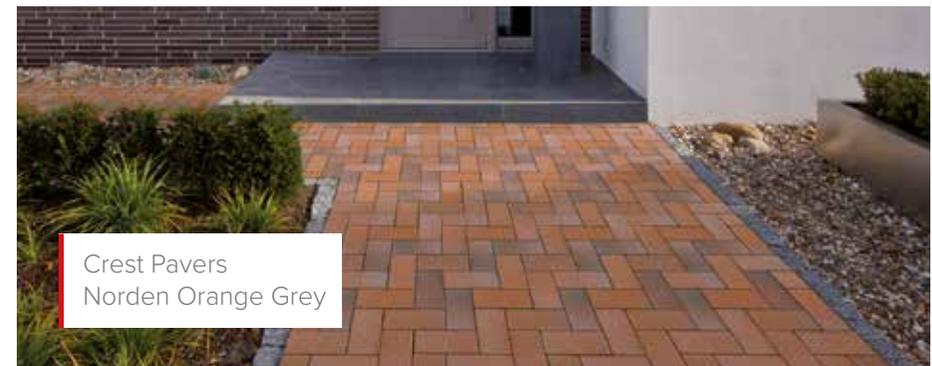

### Appearance

These clay pavers are coloured throughout the brick, which is obtained through the quality controlled firing process.

### Longevity

In time the colour intensity of brick pavers actually increases, increasing the appeal and timeless character of the environment.

## CREST CLAY PAVER RANGE (292 herringbone series)

Crest pavers are environmentally friendly due to their durability and longevity, clay pavers can be reused and re-cycled if required. The production of clay pavers is done in an environmentally friendly and responsible manner.
